Elaborate your concern :

[6 responses](#)

First of all, for the second sem when we were not in the hostels and didn't had any mess food. We were charged fully. Now as most of the students father have business and due to corona business has been hit very very hard.

[2 responses](#)

Some suggestions.. Institute should try to make online platform like udemy ,edx, Coursera free for us..rather than forcing us to watch some random YouTube videos...sent by the professor and then charging such a huge amount of money ... or even if they take online class... the practical thing is that it will not help student in gaining knowledge as much as these pre established platform can give through discussion platform and hands on assignment with such good support through their instructor who are available 24x7 for our doubts and queries ... Also students can learn from online platform according to their comfort and schedule.... taking online Classes at a fixed time is not possible for each of the student.. there is nothing much he or she can do if they miss one of the class ... and also they cannot tell the

professor to take their class again.. they also cannot makes Notes while lecture as they cannot pause the video ... and after class is over everybody knows that most of the thing are still doubtful... All the things written above are my own experience of online classes through nit jsr faculties..with all respect .. I Still remember... how the maths professor used to just read the notes line by line for one hour ...and all of the student had just came to mark their attendance ...the sad reality was that nobody actually used to know that what's actually was going on there... Or The professional Ethics professor had just c taken classes like formality so that it can be shown that he had done his job.by taking classes.. rest the students will handleby themselves... Comingback to the fees issue... Our institute should show some mercy in tuition fees as they might say that they have to pay the teachers..but do they think ...are all the students parents are also getting their full salaries or all of them are doing some kinda government job so they will have no income shortage... during even the lockdown.. Institute should realise that they are not the only thing that has been closed..it's been almost 4 months since lockdowns and it is still being continued in many states .. including mine (bihar)... But my point is that most of the middle and poor class families have been economically affected..as most of the businesses and their work has been affected by the pandemic very badly... In last sem no online classes were conducted by our IIIT faculty, still we were forced to give exams. We people are at our home since mid March but there is no refund of hostel or mess fees. Now again the administration is charging a huge amount. So my concern is that the amount for the fees should be reduced to as minimum as possible. In this situation of pandemic this is really difficult for us to pay such a huge amount. We all know how much knowledge we gain through online classes and for that if we have to pay such a huge amount, then it is totally unjustified. This is what all of us think and any level of work in this direction is acceptable. All of us know that this fees charging issue is not happening in only our institute but in many other IITs, IIITs, NITs too... During this hard time out institute should set an example to other institutions of our country that"Our IIIT RANCHI not only believes in teaching their students Moral and Professional Ethics as a bunch of theories for test paper but also make them truly understand its true meaning by embracing it's ideology in their decisions for this issue" Hail IIIT RANCHI THANKS.

1 response

This is in concern with the high demand for fees for the upcoming semester. I don't understand how can the institute be so selfish in asking for such a huge fee knowing how this pandemic had affected all of our social and financial lives. This lockdown had affected almost all of our income sources and in the past three months hardly there was any work done in the whole country as everything was halted down and which was necessary too. And this is a time where we can support each other and help in the growth so that the world revives itself soon. We were fully aware at the time of taking admission into IIIT Ranchi that the education is gonna be costly but it is fine because as we will be bagged with the best possible education but after getting into the institute we got to know the ground reality and when this was not enough this global pandemic happened and that affected our education more. We have been shared the youtube links of NPTEL to study from there. I want to know if I had to study from free sources why would i have come to an 'Institute of National Importance', for degree? , well, in that case, i don't think degree matters more than education, As our respected Director Sir itself said regarding online exams that they don't want the batch to be known for general promotion so he wanted to conduct exams and that was a thought which we look up in our professors and director. But after such a wonderful message, asking for such high fees isn't valid. Thereby, I request the administration to reduce the Tuition fees of 90000 INR to at least half of it, and as we had to recharge for the internet at least double what is being needed now and maybe even get a broadband connection if the internet doesn't work fine and since we are not using any institute facilities like internet, bus service, library, classes, electricity so i would like to appeal to nullify them too as long as we are stuck at our homes. I/We students have high hope from our institute that it will understand our concern and will take an appropriate step which will benefit all, as we do not even want

our institute to reduce its fees up to 90%. We just want that institute reduces its fees at least that much so that it will be payable by all of the students in the institute without affecting their family's conditions more and does not affect faculties income too.

1 response

I got a seat at IIIT Ranchi due to category reservation and as Computer Science was my priority. But I also walked over two colleges under the State government to do so. I only opted for the institute as I thought there'd be fee remission for SC/ST categories. By the time the fee structure was released on the institute's portal it was already too late. You guys didn't even have the fee structure of the previous batches to base an assumption from. I was hesitant to join but I thought it's still a college of national importance so it would be worth the money. It's not. The fees we pay aren't even justifiable for the offline classes let alone the online Classes. The schedule is all over the place, the pace is crazy. and, that's just the offline classes. The iiit faculty didn't host a single online class. All we had were YouTube links, assignments and lab work. Kudos to the Nit faculty who were assigned to us, they actually did their jobs. Also one of the notices stated that we were having summer vacations during the lockdown. So, in a way we were asked to pay fees during our vacation. We didn't get our mess fee back. And now there's the new semester. We are expected to pay a sum of 107.5k. honestly, we get the institute fee and hostel occupancy fee. But the tuition fee is absolutely ridiculous. We will be paying for the internet by our own means for classes that aren't upto the standards, we have no access to a proper library or a lab and are still expected to pay 90K. Might as well flush some money down the drain. We aren't exactly getting the amenities we should be getting when we are paying this amount of money. The other iiits have already begun the construction of their permanent campus. The other 2k19 batch will probably see their fees come to fruition but not us. The students from our batch have few requests - ---The refunds from the previous semester be sanctioned before asking for fees for the new semester. ---The tuition fee be minimised to a reasonable amount; Suitable for both the students and the institute. ---The students be notified of the expenses of the institute (both previous and future) through valid records.

1 response

The fee structure has the section "Tuition fee" for which we need to pay 90k. To me, this is not justified. Especially at times such as this where everyone is facing some sort of financial crisis. The institute needs to realise this fact and come up with provisions to reduce the overall fees to at least half the amount. Even if the institute demands such high fees, there's no point asking for computer and internet fees in institute's fees. The institute should give some relaxation and provide reimbursement to us for Internet as internet is still not a cheap thing. When we are not in campus using any of there infrastructure, the college should give relaxation in Computer and internet fees. Institute should also give relaxation on Bus transportation fees too as we don't have this facility in our college either. The biggest part about tuition fees is that we pay tuition fees to receive tuition and not some NPTEL Video links. Its really a very unethical and unprofessional attitude from institute. This in way shows the lack of interest professors have in our future and studies. Last semester, none of the professors of IIIT took our online class, only the NIT JSR professors were regular in taking class and were concerned about our education. Please look up to the standard of teaching of the institute before asking such huge amount of tuition fees for online class which some professors avoid by passing YouTube links and declaring the syllabus complete.

1 response

Due to this pandemic, all of the family income sources have come to a halt and it is a serious concern if the institute will demand such high fees during this time. Regardless of the facilities offered. We have been asked to pay 90000 for tuition fees which I don't think is valid in this period. Most probably the classes will be held online unlike last semester where classes were not even organized. And for an online class, good internet connectivity is required and here at my home, i am hardly able to play video on youtube. So i request you to look for this issue and reduce the tuition fee at least half of what presently it has been asked and even we are not even using any of the institute facilities so why it has been included in the memo. Kindly think of all the students studying in the institute who come from different parts of India and different family backgrounds and take appropriate action by first reimbursing the last semester fees and reducing the fees to at least half of what's been asked of upcoming semester.

1 response

In this pandemic situation we don't know upto when this situation is going to be there and since the classes are taken virtually and we are not even using anything from the institute then what for institute fees, and tuition fees 90k!! why don't you can do one thing when ever the institute reopens then you can take the fees now taking fees with no proper classes and even in the last semester you have to think over it if its just for money then i don't think that our futures are in the right hands. You're just concerned about your salaries only just for once think of other who haven't got their salaries for the past 3 month's or may be more how can they be able to pay. And those who applied for loan in this situation the banks are even not functioning properly how the loan request can be further forwarded. I don't understand why you're unable to think in view of everyone. Please think over it.

1 response

The pandemic has hit all of us very badly. Everybody is suffering financially. In the previous semester for approx 5 months the classes were held online for which we should get a refund. And in that too, only for 3 subjects the classes were held and for the rest 3, they weren't. Asking for 90k as tuition fees for the autumn semester is clearly invalid and too hefty. And kindly put forward a strong base for asking the institute fees and hostel occupancy charges. When we are not gonna use any of the institute or hostel resources, demanding such a high fee is just showing how the IIIT institutions have turned education into a sheer business. I believe first of all we should a refund for the previous semester. Secondly, the fees for the autumn semester should be reduced to 50% of the mentioned amount .

1 response

The hostel occupancy fees shouldn't be made mandatory it should be given as a choice since for some of us who lives nearby can vacate our rooms and can take away our belongings ,the other concern is

regarding the tuition fees since in this critical and crisis situation among some of us in our families lost jobs or is not getting complete salary so there should be some concession in tuition fees because in this semester due to the present situation it is most likely that everything will be online so a little concession from the college authority will be a great relief for all the parents .Also regarding our hostel and mess fees of last semester it was informed that it will be refunded or adjusted but nothing as of now has been done yet ,so some information regarding this would be of great help .

[1 response](#)

1. The mess fee hasn't been refunded yet. The deposit was made to the IIITR account, they are responsible for that. 2. Half of the fees of the spring semester should be refunded back. No activities was done during the spring semester. 3. The tuition fee of this semester should be reduced to less than 30 thousand. None of the faculties are going to do anything as evident by the current semester. No lab facilities would be provided. The institute will have no responsibility of the students whatsoever, regarding this in mind, 30K is itself a big amount. 4. If we are paying for the hostel occupancy fee, it should be declared officially that we are going to stay in Jamshedpur for this semester. THIS ISSUE MUST BE RAISED.

[1 response](#)

In the present pandemic situation, charging the whole tuition does not seem to be reasonable as for the previous 4 months many of the indian families had no source of income and charging a fee of 1,00,000Rs and asking to pay within a short period of time doesn't seem to be justified. And the process online classes differ compared to that of offline here we can't access the hostel facilities and we should spend extra amount for the network issues still struggling due to the village network problems. And we don't even had the refund of the last sem. We demand a justified statement for the fees and the refund that should be done for the last sem and need some time for the payment.

[1 response](#)

Since most families, aren't in a condition to pay the fee at the moment due to Covid-19 pandemic situation. We will not be going to attend the Institute physically & There will not be any kind of sports/Fest/Event/workshop going to held. We will have to just attend the live classes online and that will cost more data usage because of which we will have to buy data pack and it will cost more money than usual. So, why we will have to pay the same amount of Institute fee! When we aren't getting anything in return except academics. Sorry Sir, But think about this topic and think about us! . Regards Aryan Singh
CSE First year(Class Representative)

[1 response](#)

Well my concern is about the tuition fees which is equal to 90k which is not fair as all the teaching process will be shifted to online platform. The quality of education we get offline cannot be compared with it. In this hard economic time we should be given some concession in the tuition fees, I don't know how much the institute can manage but it should take condition of students too. Hard time is for all of us for students also. We should be given money through which we can make internet recharge for the online classes. I will be highly grateful to the student council for positive response on the above note to the administration.

[1 response](#)

In last sem no online classes were conducted by our IIIT faculty, still we were forced to give exams. We people are at our home since mid March but there is no refund of hostel or mess fees. Now again the administration is charging a huge amount. So my concern is that the amount for the fees should be reduced to as minimum as possible. In this situation of pandemic this is really difficult for us to pay such a huge amount. We all know how much knowledge we gain through online classes and for that if we have to pay such a huge amount, then that is totally unjustified.

[1 response](#)

1) why isn't the previous semester's extra fees adjusted here. 2) why are we giving hostel occupancy charges which makes no sense 3) why is the tuition fee all the same when most of the expenses to attend live classes and take online courses are done by the students themselves. When there is sacrifice on studies or marks to be compromised with previous marks because of covid then the tuition fee (i.e ₹90,000) is not justified. The whole financial states of people all over the country is suffering, so we demand a wave-off in the fees.

[1 response](#)

In the previous semester, only 3 faculties conducted online classes and the rest 3 didn't. So in this semester, we don't expect the same thing to repeat. Classes for all the subjects must be conducted properly and the faculties should be responsible and answerable in case if they don't. Online lectures doesn't just mean sharing YouTube video links in the official Whatsapp group and declaring that portion as completed. I believe we should be provided with quality education in return of the fat fees that we guys pay.

[1 response](#)

Thank you for the form. I must accept I feel cheated when I am asked for 90,000 rupees and a total fee of above a lakh while we are being given quality of education not even equivalent to piece of shit. Moreover

the teachers didn't even take online classes (they not even tried anything to help us! Simply gave us YouTube links that we already knew about). Once again giving them FEE for sending YouTube links is not what my parents earning and paying for.

[1 response](#)

Sir, this hemanth from first year. Sir due to Corona our family is have better backward financially more due to lock down, in our area. So I am requesting you decrease tuition fee and please refund spring semester mess fee and decrease the new semester tuition fee and make understand our request. So, sir requiring you sir please understand our problems regarding the fee due to financial circumstances due to corona. Thanking you sir.

[1 response](#)

I belong to lower middle class family with not so good financial condition and moreover during this pandemic time it is completely impossible for me to pay such high amount of fees. So considering this pandemic situation it would be better if the fees is charged accordingly because in this extraordinary situation it is even becoming difficult to meet both the ends. I hope you will get my concern and try and help it out. Thank you.

[1 response](#)

At this time of pandemic, when students are all attending classes from home, I find the latest fee structure quite steep, where only the mess fees has been waived off. Even though we won't be using the Institute infrastructure for now, the institute is charging "Institute Fee" and "Hostel Occupancy Fee" which I don't find reasonable. Above that, we have not been refunded the mess fees for the even semester.

[1 response](#)

We do realise that its necessary to provide teachers and other staff members thier salary ontime but its also a reality that many of our batchmate's family have no source of income for almost 4months and struggling with all the misery due to this pandemic .So its my request that there should be 35-40% salaray deduction which should be reflected in fee deduction of all the students .

[1 response](#)

1. Mess fee refund of the previous sem, 2. Internet charges, 3. State valid reasons for Tuition fees, if possible reduce the amount, 4. state valid reasons for Institute fees, if possible reduce the amount, 5. Those who have taken loan need to submit the result of the previous sem, for further payment to the institution. how will they pay the fees if the loan criteria are not fulfilled?

1 response

The fees being charged from us is way much larger than what actually we must charged given that we haven't used any facilities of the college. Also, the online classes were not taken for all the subjects. Instead, we were provided with you tube videos to go through it on our own. So, I would request our authority to look into this matter and charge reasonable fees from the students.

1 response

Though we will be having online classes, I don't think the fee structure for this semester worth it as Many unnecessary fees are included .The fee structure must decrease to 30-40%. And also regarding hostel allowances, you should give us decide whether we need it or not. I am having my home close to college so i can take my stuff back to home and save 7k.

1 response

Amount of tuition fee is to high. Many students have education loan and many on them doesn't have any income source in this lockdown. So how they can arrange such a huge amount for fees. You have to take only half of the current tuition fees and refund mess and other fees of ongoing semester. Why should we pay for that facilities which we are not using.

1 response

As we know that this semester we will be continuing our study in online mode and seeing the condition of online classes the amount of fees we are paying is too much. I mean this semester we will not have lab and all such things so I think our institute fees should be reduced and also we haven't got our refund for mess fee of previous semester.

1 response

1) Sir I belongs to poor family , we have not good source of income . Fee structure of autumn samester is to not fair , how can you charge that large amount of money in this crucial time. So sir please once you think about us and our conditions 2) There will online class not the class room or offline no lab .

[1 response](#)

Tuition fee should be reduced to atleast half the current one. Tuition fee is quiet much regarding the current situation. As we are not using the resources such as electricity water internet etc. until the college reopens. So there should be proper deduction in these fee. So, take proper concerns regarding this.

[1 response](#)

It's just not fair First we want refunds of our 2nd sem mess fess...and 90k tuition fee for just sending the links of 10 years old YouTube videos..... Secondly , due to lockdown the income has also reduced for may families....and lots of losses in the business.... justice should be done....

[1 response](#)

Sir its the case of most of us that our parents are doing some kind of business or owning a firm. Due to lockdown the earnings have been minimal so most of us are facing probelms to even buy basic neccesaties . So the fees should be reduced ,inorder to make it affordable for us .

[1 response](#)

My father is a business man. Due to corona pandemic his business is badly affected .As the result , atleast this time I am not in the condition of paying such a huge amount of money. Please charge the registration fee when institute would be open. Thank you

[1 response](#)

As we are not in the institute, the institute fees should not be taken otherwise reduced. Same goes for tution fees which should be reduced due to the present scenario. Hostel fees should be cut out. Previous semester's internet charges should be refunded.

1 response

The fees of about 90000 is way too much for education imparted via online mode in the field of engineering where hands on knowledge transfer is of more importance than online video lectures. Thus, the fee should be appropriately reduced if possible.

1 response

As we have seen in last sem our syllabus was not completed and exams were taken. The tuition fee for that kind of education is not appropriate. If you want to take that much fee then in return please give us appropriate amount of course materials.

1 response

the institute fees basicly consists of all services like medical attention or high speed internet charges which we are paying for even when we are at home and getting our seperate services on our money, so institute fees should be waived off

1 response

Tuition fee is reduced to at least half the current one. Tuition fee is quiet much regarding the current situation. As we are not using the resources so there should be deduction in the fees .so please take proper comcerns regarding this.

1 response

As because of in this pandemic situation, every family can't afford that much of paying fees as many are suffering from economic issues. So, you are requested to please revise the fee structure and make it affordable for all the students.

1 response

Sir, this pandemic has hit us financially, my father is getting only a fraction of his salary, I don't think it's fair to ask for the fees regarding services we are not availing, viz, hostel fee, institute fee, 90k tuition fee

[1 response](#)

We had already paid thousands of dollars. It's now time for fee-wapsi. There is a huge difference between online and classroom education, and there is still uncertainty over both the pandemic and our graduation.

[1 response](#)

Why do we pay full Institute fee, that is 10,500 even when we won't be using many facilities, like bus service, internet and computer, library, sports, medical services, etc. This amount should be less.

[1 response](#)

It's not fair to collect fee like institute fee as we are not using institute and they are collecting money like some private colleges we need justice for this and if possible reduce tuition fee also

[1 response](#)

since most of the labs and classes are not being held or being just held for the sake of getting a tag of "completed course" it is my concern of whether to pay such an huge amount as tuition fees.

[1 response](#)

As the classes are going to be online in the next semester, tuition fee is very high in that respect. There is also no need to demand institute fee because we are attending classes from our home.

[1 response](#)

My father works in private sector so due to this lockdown his salary affected and in this situation I can't even ask him. Without being in College I can't afford that amount of money.

[1 response](#)

Online classes were not of much benefit. And in some subjects we didn't even had been taught, were Only provided with YouTube videos links. And also no practicals. 90k for what?

[1 response](#)

Institution Fee is too high because we are not using intitution facilities, also all teachers are not active towards online classes , they simply forward youtube lectures!

[1 response](#)

In this tough time of Pendmic as we are not in our institute and we are not using any of it's resources then why we pay for institute fees Or something like that.

[1 response](#)

Hostel fees should be decided and taken after our stay in hostel is decided. Internet expenses for online studies should be adjusted from tuition fees.

[1 response](#)

Due to the covid-19 pandemic my father has lost his job and we are currently running on our savings. So it is a bit hard to pay the fees

[1 response](#)

Apart from the tuition fees,the additional "Institute Fees" &"Hostel Occupancy Fees" are totally unjust and shouldn't be taken.

1 response

I don't want to pay any kind of hostel occupation fee as I can take back all my stuff to my home.

1 response

Due to pandemic, business is in lost how can we pay the institute fees whic is much expensive

1 response

Tution fees is so high if institute is going to take our classes online.

1 response

Need to give 50% weightage for online test and 30% for previous semester

1 response

Complete detail of the fee structure (including tution fee)

1 response

Tuition fee should be reduced.

1 response
